

# KEEPING UP WITH THE TIMES FOR MORE THAN 140 YEARS

INA MAZIVA is a leading company in production and sale of lubricating oils and greases and one of the oldest manufacturers in the Southeast Europe.

We have been with you since 1883, transforming our vast experience and expertise into new products every day

**i** Please visit our website and learn more [www.ina-maziva.hr](http://www.ina-maziva.hr)

- 2% Grease
- 4% Additives
- 18% Industrial oils
- 20% Car chemicals
- 27% AdBlue
- 29% Motor oils

INA MAZIVA is a part of INA Group consisting of subsidiaries that are fully or partially owned by INA d.d.

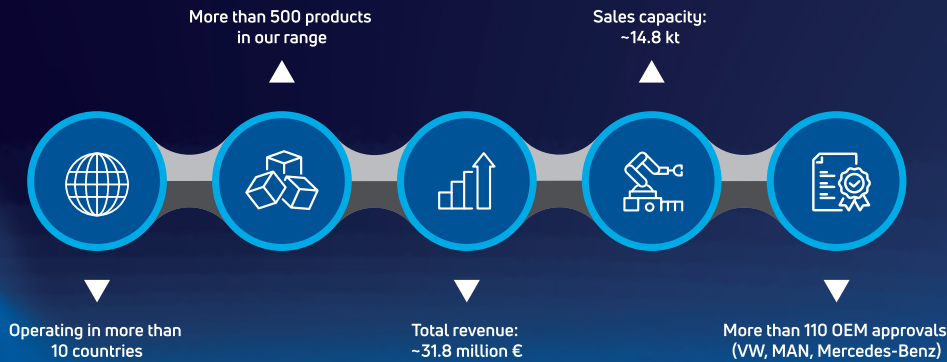

We have an environmental permit, a waste management permit, and we are registered in the Collector and Recycler Register as a collector of waste oils.

Free analyses of waste lubricating oils and emulsions.

INA MAZIVA's laboratory is also qualified and equipped for a total of 150 different testing methods.

## INA Car Cosmetx

A premium line of car care products is available at INA retail stations.

## Filling service

We are the first company on the Croatian market with the production of products in soft packaging and, apart from using soft packaging for packing our own products, we also offer the filling service to customers who want to market their own brand.

## Additives

We offer high quality additives that improve performance, efficiency and longevity of lubricants and ensure reliable work in the most demanding industrial and automotive applications.

## Key development or investment project in recent years

- New filling line (LSP-1)
- HDPE packaging production machine
- AdBlue plant
- Laboratory modernisation
- Digital B2B platform
- Solar power plant and energy transition projects (heating and cooling systems)
- New products
- New product design and packaging

## Focus areas in terms of innovations, technology and sustainability

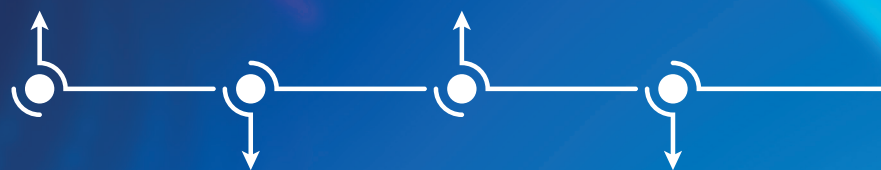

- Products based on regenerated base oils
- Biodegradable fuels
- Wearcheck oil diagnostics
- Recyclable packaging (70% less plastics)
